

**Product(s):** 70E, 90E, 90IE, 90P, 130P, 175P, 225P

**Tool(s):** -

**Spare part/Accessory:** All Power Pack Motor Controls

**Article number(s):** 20001A-(all models)

**Date:** 2022-04-21

### Power pack upgrades

Pronomic is replacing the motor control in all Power Pack units and replacing them with a newer version. In doing so, our Power Packs become even more stable and service friendly. Your hand-held programmer will still function with the newer model.

#### Benefits:

- New and more stable motor control
- New settings available on the motor control
- More service friendly units and easy to replace motor control enabled by quick connectors instead of fixed wiring
- Same version of motor control unit will now be used for our power packs and electric attachments, only different parameter settings. This makes spare part ordering easier

Project applications related to Lift&Drive 90P - 225P, additional new features are available:

- **Current Boost**  
Used for extra power when lifting from standstill in projects where *maximum current* is set for a certain load. This will be the standard setting for all new power packs.
- **Speed mode**  
2 speed settings can be used and are switched by a 24V signal. To access the Speed mode function, new cables and fittings are required as an additional option.

Lift&Drive 325P is already equipped with this motor control.

**The new Power Pack:**

The implementation of the new motor controls will be ongoing during Q1 2022, one model at the time. When the new motor control is implemented in the product, this will be visible on the article list on the order confirmation. There is no change in pricing.

The older motor controls will be available to order as spare parts. It is important to check what motor control is valid for the current Power Pack version on the trolley before ordering.

The following is a list of Power Packs (PP) and motor controls (MC) and their article numbers:

Lifter model	Current PP Blue	Current PP Stainless	Current MC	New PP Blue	New PP Stainless	New MC
